## FEATURES

- 

It is one of the easiest to install and safest systems in the market. We just need to adjust the board to be installed longitudinally to the one already placed, by applying a soft pressure without the need for any type of tool. Both pieces will fit and will be secured thanks to the safety tab. It is just as simple to take apart, which makes for a quick disassembly
- 

Slight smoothing of the wood using a brush to achieve a surface with a slight relief.
- 

L'ANTIC COLONIAL's varnishing, in two finishes, APRESTO (gloss) and APRESTO MATE (matte), provides a unique surface quality that satisfies the most demanding requirements. Advantages: It achieves the highest cleanliness because, since the pores are sealed, dirt and dust remain on the surface and can be easily cleaned.
- 

Is suitable for installing on water radiant heating
- 

Material with many knots on its surface that can have different sizes depending on the type of wood. These, along with any cracks that may appear, are covered with putty.
- 

Installation system where gluing the boards to the floor is not necessary. They are installed on a foam and joined together
- 

There are consistent color changes between pieces.
- 

PanEuropean Forest Certification that guarantees to consumers the origin of the products from sustainably managed forests
- 

Noble layer
- 

Applying a color oil or varnish on the wood surface in order to get different color ranges.
- 

Beveled cut on the long sides of the board in order to create a continuity effect
- 

Quality product made with selected raw materials, guaranteeing its full residential use for 30 years as provided by L' Antic Colonial.
- 

Format where only one board has been used to finish the entire base surface
- 

It is necessary to apply adhesive for installing it.
- 

Made with oak wood.
- 

Material from a European country.
- 

Structure formed by an upper layer that shows the noble aspect of the material, an intermediate layer of wood of different typology, depending on the collection, or HDF board that compensates the tensions between the different parts and a lower plywood that provides dimensional stability.
