

skins fix

skins fix is a coloured adhesive for the installation of all types of wallpapers: non-woven fabric (TNT), vinyl, duplex, light, heavy and other wallpapers. The colour indicator marks the area where the glue has been applied, facilitating the application of the wallpaper. Especially developed for the installation of SKINS WALLPAPER from L'Ac®.

Characteristics

- Ready-to-use adhesive.
- Pink colour during application, transparent once dry.
- Applicable on furniture and doors.
- Suitable for environments with the presence of humidity such as kitchens and bathrooms.
- Suitable for all types of wallpapers: light, heavy, vinyl, woven or duplex.

How to use

Before applying skins fix, check that the support is dry, clean, solid and has adequate absorption. Check that the application temperature is between + 10°C and + 25°C.

Follow the paper manufacturer's instructions for applying the glue to the wall or to the back of the paper.

- Wall application:

Apply the glue with a roller directly on the wall, at least 10 cm more than the width of the paper to be glued. Once the adhesive has been applied, place the wallpaper within 30 minutes according to the instructions of the wallpaper manufacturer.

- Application on wallpaper:

Brush the adhesive onto the back of the paper and fold the paper in half over itself. Let stand for about 10 minutes and stick according to the wallpaper manufacturer's installation instructions. Once the wallpaper is installed, remove excess glue with the help of a damp sponge.

Una vez realizada la instalación del papel pintado, retirar con la ayuda de una esponja húmeda los excedentes de cola.

Performance

Approximately 125 gr per sqm.

Cleaning and maintenance

- Remove any excess glue with a sponge before it hardens. After installation, clean the tool with lukewarm water immediately after use.

Conservation

12 months in its unopened original container, protected from the elements and frost. Store between + 10 and + 30°C in a dry place, covered and protected from direct sunlight.

Hygiene and safety

Contains MIT, may cause an allergic reaction. Keep out of the reach of children, do not ingest. Consult safety data sheet.

Technical data sheet conditions

- This technical data sheet does not correspond to a finished product but to a laying material that, together with other products and materials, determines a laying system. The indications in this technical data sheet have been drawn up based on our experience and technical knowledge, but they must only be considered as general recommendations which, in addition to those of the rest of the system products, guide the professional installer in the performance of their work.
- Given that it is not possible to know all the characteristics and conditions of the work, it is up to the professional to assess it and, where appropriate, to carry out a preliminary test, which confirms that the product is suitable for the work to be done.
- The technical data sheet cannot reflect all the applications and conditions that intervene in the use of a material, therefore, in situations not described in this document, it is recommended to carry out a preliminary test and consult our technical department.
- This file has been updated in June 2021.
